

## **AAA Club Descriptions - Session 1**

### **August 29<sup>th</sup> - November 4<sup>th</sup>**

**Barnabas Club:** Barnabas literally means “son of encouragement” which is a name given to Joseph by the other apostles because of his God-given gift to encourage others (see Acts 4:32-37) using his time, talents, and possessions to see Christ’s mission come to pass. If you would like to learn more about Barnabas and spend the next several weeks looking for ways to use your time, talents, and possessions, please join us! Some of the time will be spent studying scripture and some of the time will be spent doing service projects and hearing from guest speakers. The fee for this class is \$50 and will be donated to the various ministries that we explore/visit. Times and dates are subject to change based on service projects.

**Advanced Art with Mrs. Sanchez:** Do you feel like the creative side of your brain could use a little wake-up call? Come have a multi-media experience in the art room where you will design and create 4 amazing projects including drawing, painting and 3D - and have a great social time with your peers! This 8 week session will be relaxing and enjoyable as you create at your own level.

**Your Shot Golf:** This class will meet at the Bellair Golf Course and the price will include driving range, chipping, putting, and some holes played. The class will be tailored for golfers who are beyond introductory play and desire to better their skills. Parent transportation or carpools will need to transport students across Bell and 43<sup>rd</sup> Avenue to the golf course (this is the student’s responsibility to line this up). This class will prepare golfers to compete in the National Drive, Chip, and Putt contest. Clubs provided if needed.

**Crusader Chess Club:** Chess Emporium teaches a fun and exciting introduction to the game of chess. All grades are welcome in the chess club, which begins by teaching students how to play the game, chess openings, tactics, and endgames, while allowing students to practice with their friends. Studies by major corporations and universities have shown that chess can help students increase their math and verbal skills, as well as their creative and critical thinking abilities. Chess provides helpful insights into mathematics, visualization, analysis, and writing skills. This class provides chess strategies and tournament play in this club experience. Students who sign-up for this class will find where they rank by earning a Chess rating number based on tournament play.

**Mathletes:** Individualized Math Instruction for all levels of learners. Come maximize your full mathematical potential!

**C.A.C (Cooking, Activities, & Crafts)** - Reminiscent of the good old home economics class, we will cook interesting items like quesadillas with an iron, learn how to sew a button, and create Pinterest inspired crafts. All supplies will be included in the cost of the class. Come have fun with friends.
